

Characteristics of the Uninsured in Texas, 2018

Spotlight: Harris County (Houston)

Matthew Buettgens, Linda Blumberg, and Clare Pan

The share and characteristics of the uninsured population vary substantially across geographic areas within Texas. This fact sheet shows the number and characteristics of nonelderly people in **Harris County (Houston)** who were uninsured in 2018. These estimates are produced using the Urban Institute's Health Insurance Policy Simulation Model (HIPSM) and are part of a statewide analysis available here http://bit.ly/TX_Uninsured.

In 2018, an estimated 22 percent of people below age 65 living in Harris County (Houston) were uninsured, compared with 19 percent of all Texans and 11 percent of the US population. Among the uninsured in Harris County (Houston), 59 percent had incomes below 138 percent of the federal poverty level, 13 percent were non-Hispanic white, 65 percent were Hispanic, and 14 percent were non-Hispanic black. 13 percent were eligible for Medicaid or the Children's Health Insurance Program, and 15 percent were eligible for premium tax credits for private marketplace coverage. 192,000 people would become eligible for Medicaid if Texas were to expand eligibility to those with income below 138 percent of the federal poverty level, as permitted under the Affordable Care Act. Also, 71 percent of the uninsured in Harris County (Houston) were in working families, 46 percent were in families consisting entirely of US citizens, and 71 percent of adults had a high school education or less.
